

**Job Title: Research Technician**

**Company:** Ora Biomedical, Inc.

**Location:** Tukwila, WA

**Job Type:** Full-time & part-time roles available

**About Ora Biomedical, Inc.:**

Ora Biomedical, Inc. is a longevity biotechnology company dedicated to revolutionizing healthy lifespan by targeting aging. Located in South Seattle, we use robotics and AI to perform large-scale, high-throughput longevity drug discovery and development. We are passionate, hard-working biomedical researchers and are looking for a motivated Research Technician to join our dynamic team as we discover revolutionary longevity interventions that broadly fight chronic illness and maximize healthy life.

**Position Overview:**

As a Research Technician at Ora Biomedical, Inc., you will play a crucial role in supporting our research projects. This position offers an excellent opportunity for individuals with a passion for science and a desire to work in a collaborative, fast-paced, and innovative environment. We are excited to identify individuals interested in long-term positions with the strongest possibility of promotion and career advancement. Help us grow the largest, highest quality, and most rigorous longevity interventions database that has ever existed!

**Key Responsibilities:**

- Assist in the planning, execution, and analysis of experiments under the guidance of the Director of Invertebrate Research.
- Maintain laboratory equipment and ensure proper functioning.
- Prepare and sterilize laboratory materials and reagents.
- Collect and record data accurately, maintaining detailed record collection.
- Participate in the development and optimization of experimental protocols.
- Collaborate with research team members to achieve project goals.
- Ensure compliance with safety regulations and laboratory protocols.
- Assist in the preparation of research reports and presentations.
- Stay updated on relevant scientific literature and advancements.

**Required Qualifications:**

- Proficiency in basic laboratory techniques and equipment.
- Strong attention to detail and excellent organizational skills.
- Ability to work effectively both independently and as part of a team.
- Commitment to safety procedures and ethical conduct in research.
- Enthusiasm for scientific research and a desire to learn and grow.

**Preferred Qualifications:**

- Previous experience with using *C. elegans* as a laboratory model.
- Previous experience with Linux based operating systems.

- 
- Previous experience with scientific software, robotics, or other engineering projects.

### Why Ora Biomedical?

Joining Ora Biomedical means becoming part of a pioneering company at the forefront of longevity science. You will have the opportunity to work alongside scientists and business leaders dedicated to discovering new ways to extend healthy human lifespan, while helping the company grow its impact in the biotech industry. Our benefits include:

- Robust employee equity options (full-time only).
- Health, dental, and vision insurance plans (full-time only).
- Retirement savings plan (401k) (full-time only).
- Opportunities for professional development and training.
- Collaborative and innovative startup culture.
- Paid time off and holidays.

**How to Apply:** Interested candidates are invited to submit their resume and a cover letter detailing their interest in the position to [mitchell@orabiomedical.com](mailto:mitchell@orabiomedical.com). Please include "Research Technician Application" in the subject line of your email.

Ora Biomedical, Inc. is an equal opportunity employer. We are growing an inclusive community that values and celebrates the rich diversity that is the Human experience. We encourage candidates from diverse backgrounds to apply.

Join our team and help us change the World through longevity therapeutics!
